# VAPOR X:60 SKATE

---

0 TO 60  
IN YOUR X:60

Whether it's for 60 seconds of all-out speed or going full-tilt for a 60-minute game, the skate that continues to make the game faster is the VAPOR X:60. A culmination of 80+ years spent perfecting fit and comfort, the sixth-generation VAPOR X:60 is the ultimate in high-speed performance. Built from the outside in, it uses the patented X-rib construction for structure and stability, allowing for fast acceleration and explosive turns. Quick feet need quick skates — and it doesn't get any quicker than the VAPOR X:60.

**FULL TEXALIUM COMPOSITE OUTSOLE**

Dynamically rigid, the full TEXALIUM composite outsole offers top-of-the-line performance now in a roller hockey boot - increased foot stability equals maximum energy transfer for increased speed and tile biting stops.

**HYDRA-MAX LINER**

One-part moisture-wicking. One-part abrasion-resistant. Together, it adds up to a superior liner that keeps the feet dry and cool and locks the heel in tight. A durable top layer minimizes wear and tear around the top of the ankle.

**FORM-FIT 2 TONGUE**

A tongue needs to flex, protect and provide fit and comfort. We molded the tongue anatomically to allow the player to flex forward easier. We added an exterior high-density metatarsal guard to protect against puck impacts, and we created an interior channel to alleviate lace-bite pressure, and prevent the tongue from rotating on the foot, delivering a superior fit.

**CONSTRUCTION / FIT**

Built from the inside out. This straightwall boot construction has a patented integrated X-rib design that provides structural support and stability throughout the boot, allowing for fast acceleration and quick turns. The angle of the boot is cut aggressive to allow greater forward flex.

## Find Your Flex

MODEL	FLEX	PLAYER PROFILE	CUTTING THE STICK DOWN CHANGES THE FLEX		
			2"	4"	6"
YTH	42	Kids are growing up with composite in today's hockey market, it should start with Yth players.	49"	57"	67"
JR	52	Generally for ages 8-12 where the skills are in early development and softer flex will enhance puck velocity and increase release time.	60"	68"	77"
INT	67	This flex is great for the Pee-wee-Bantam age player that has smaller hands that can't quite use a SR shaft dimension but needs the longer blade for controlling the puck.	74"	80"	87"
SR	77	For the player seeking maximum energy loading; this is the softest flex available in the market today in a SR shaft dimension.	84"	92"	100"
SR	87	Probably the most popular flex rating today, this is for the player seeking a quick-release whether it's a one-timer or streaking down the wing.	96"	105"	112"
SR	102	This is for the player that has an arsenal of different shots within their game.	108"	115"	122"
SR	112	Targeted for the bigger, stronger player that needs max. stiffness when leaning into a shot. This stick is designed to withstand the maximum loading by today's power forward or defense.	118"	125"	132"

## Helmet Sizing and Certification

Open helmet to its largest setting and position on the head so that the front edge of the helmet is one finger width above the eyebrows. Slide the front and back portions of the helmet together until a comfortable, snug fit is achieved. Tighten the adjustment mechanism. BAUER recommends the use of a mouth guard. Players should only use CSA, HECC and CE certified helmets. These helmets have stickers affixed that indicate their compliance with the applicable standards.

**WARNING:** Hockey helmets are required for all levels of play and must meet CSA, HECC, or CE certification standards. All BAUER hockey helmets meet or exceed these standards. Ice Hockey is a collision sport that is dangerous. These helmets afford no protection from neck, spinal, or certain types of brain injuries including those that may be caused by rotational forces. Severe head, brain, or spinal injuries including paralysis or death may occur despite this helmet. Do not use this helmet if the shell is cracked or if the interior padding is deteriorated. Read instructions carefully before wearing.

\*CE CERTIFIED

It is recommended that players wear CSA, HECC and CE certified facial protection. CSA, HECC and CE certified facial protectors have stickers indicating their certification.

\*Facial products carrying a Non-Certified designation do not meet the certification requirements of CSA, HECC and CE with the exception of the BAUER Euro Straight Cut Half Shield HS22CE and RBE I 42CE, which has been certified for Europe.

## BAUER RBE I Half Shield (42, 42CE)

### Half Shield:

**42** [1033754] NOT CERTIFIED IN NORTH AMERICA

**42CE** [1033746] CE CERTIFIED, EUROPE ONLY.

### Features:

- High-impact, injected polycarbonate shield
- Anti-scratch coating on both sides
- Side slots for optimal fit on helmet

Facial products carrying a Non-Certified designation do not meet the certification requirements of CSA, HECC and CE with the exception of the BAUER Euro Straight Cut Half Shield HS22CE and RBE I 42CE, which have been certified for Europe.

## Facemask Sizing Info

The facemask should fit snugly to the chin. If it is too long, it may not remain in place during impact.

When the player's mouth is closed, the chin should fit comfortably into the chin-cup. Attach the facemask securely to a compatible, certified helmet according to instructions provided within the product's packaging.

**BAUER recommends the use of a mouth guard, especially when using a half shield. Injuries to the face, nose, eyes, jaw and teeth may occur while wearing a half shield.**

It is recommended that players wear CSA, HECC and CE Certified facial protection. CSA, HECC and CE Certified facial protectors have stickers indicating their certification.

## How to Measure for a Good Fit

CHEST	WAIST	SEAT	
Measure around the fullest part of your chest, keeping the tape firmly under your armpits and around your shoulder blades.	Measure around the natural waist (where your body creases leaning to the left or the right).	Measure around the fullest part of the seat.	<ul style="list-style-type: none"> <li>• For best results, take measurements over undergarments.</li> <li>• Hold tape measure firmly, not tightly.</li> <li>• Keep tape measure parallel to the floor.</li> <li>• Match your measurements to the above size chart. If measurements fall between sizes, go to the next size up.</li> </ul>
