HOCKEY 2012

WE BELIEVE IN HOCKEY

We believe in the game of hockey. We believe in the moments we help create. We believe in one-t's from the point, scraping the ceiling on bombs and making the D think twice about trying to block the shot. We believe in knocking the puck down to stay in the zone. We believe in the assist, the apple, the dish and the playmakers who make them happen. We believe in game winners, shorties, and the perfectly executed power play.

We obsess over every detail; the weight, the shape, the balance, the texture, the feel, the pop, the look, the taper, the finish, the flex, the kick, the release, the accuracy. Lighter is an obsession. Durable is a must. We have our place in history in this game and we respect it. We have a responsibility to make tomorrow's game better than the one we play today.

Dream Crazy.

MAKO

SPEED REDEFINED

Speed isn't just about up and down the ice. So much of the game is played in tight spots. Making the quick move, the touch pass, getting the shot on net leads to one thing: scoring goals.

QUICK PASS. QUICK SHOT.
QUICK HANDS. MAKO.

Players from the Los Angeles Jr Kings experience the new Mako for the first time.

LIGHTS OUT

ZACH PARISE TALKS RS

EH: First reaction to the RS?

ZP: I've had people that are using other sticks grab mine to try it out and they can't believe how good the puck comes off. The next thing you know, they want to use it. The RS is making some noise right now.

EH: Why the RS?

ZP: I'm looking for a stick that really pops when the puck comes off. And whether I'm actually shooting it harder or not, it definitely feels like I am. I also want that consistency of hitting that corner ten times out of ten. When I get a scoring opportunity in today's games I have to make sure that when I do, I'm gonna put it where I want it. The game is so fast, defenders are so tough, and the goalies are so good that when I have that split second, I have to know I'm gonna hit that corner.

STEALTH RS SKATE

ZACH PARISE'S REACTION TO THE RS

"I like the look of the RS skate and I'm excited to try it out. This is exactly what I've been looking for. It's lower profile. You get a really good forward lean and anything like that will give you a little advantage; to get a little extra glide. Every second counts out there. To have the ability to cross over quicker, cross over better with the lower profile, which I've always found, is definitely gonna give you an advantage."

EQ50 SKATE TECHNOLOGY

Born of performance and customized fit, the Synergy® EQ50 is both lightweight and rugged enough to power through the rigors of the rink. Don't just skate, dominate with a new breed of speed.

LAUNCH ZONES
This next-generation design is as customizable as ever with its thermal-activated Fusion Foam. Our Hybrid Fusion Technology positions composite components in places you need it most to propel your feet up the ice.

HEEL POWER
The integrated EQ50 carbon fiber heel cup is connected to a low-profile composite outsole to support the full torque of a powerful stride.

TENDON
Engineered for the right balance of flex and support this tendon is strategically positioned to power your game. The EQ50 tendon is lightweight and molded to put your foot in an aggressive position to attack the ice.

SYNERGY EQ50

SENIOR **A147 141** 6-12.5 (full & half) D, EE
JUNIOR **A147 241** 1-5.5 (full & half) D, EE

: Three carbon composite launch zones catapult you forward: side-wing spring, flex tendon and heel anchor
: True 360º heat customization with an active Ideal Fit™ heel lock
: Pro-molded white felt tongue plus flexible lace-bite protection
: Light, stiff carbon composite outsole with Dry Flow™

SYNERGY EQ40

SENIOR **A147 142** 6-12.5 (full & half) D, EE
JUNIOR **A147 242** 1-5.5 (full & half) D, EE

: A more flexible hybrid of fit and performance
: Texalium glass composite launch zones: side wing, tendon, heel
: White felt tongue with flexible lace-bite protection
: Light, stiff composite outsole with Dry Flow™
: Forward Flex Design on junior sizes 1-3.5

SYNERGY EQ30
SENIOR A139 143 6-12.5 (full & half) D, EE
JUNIOR A139 243 1-5.5 (full & half) D, EE

: HyperLite base materials, anatomical and moldable to every part of your foot
: Injected tendon and side-wing launch zones
: White felt tongue and plush, red microfiber lining
: Forward Flex Design on junior sizes 1-3.5

SYNERGY EQ20
SENIOR A147 144 6-12 (full only)
JUNIOR A147 244 1-5 (full only)

: Perfect for entry-level hockey; just the right stiffness
: Ideal Fit™ shape – lace and play
: Forward Flex Design on junior sizes 1-3.5

SYNERGY EQ10
SENIOR A147 145 6-12 (full only)
JUNIOR A147 245 1-5 (full only)

THE DOME

DEDICATED TO PROTECTION & PERFORMANCE

In order to understand the features of Easton's hockey helmets, you first need to know who makes them. Easton-Bell Sports: the largest producer of sport helmets in the world. EBS makes over 11 million helmets a year for seven different performance sports. No other helmet company can match EBS' engineering expertise and testing capability. Over 40 dedicated helmet engineers, designers and a helmet testing lab are housed in its helmet technology center, the "Dome," in Scotts Valley, California. EBS also makes Riddell football helmets, Giro snow and cycling helmets, Bell cycling and motorsports helmets and Easton lacrosse and baseball helmets.

E700 HELMET TECHNOLOGY

Drawing on the innovations and expertise of the Easton-Bell Sports Helmet Technology Center, the E700 is specifically engineered with our Giro® inspired fit system to give players the assurance and protection they'll need to challenge anyone on the ice.

HOW TO MEASURE

SHOULDER PADS

: Shoulder pad should fit snugly with the tips of the shoulders properly positioned under the shoulder caps

SHIN GUARDS

: Measure from the center of the kneecap to the top of the skate boot
: Match the player's shin measurement to the size of the shin guard
: Hockey pant should overlap the top portion of the kneecap

ELBOW PADS

: When fastened securely, there should not be a gap between the elbow pad and either the bicep extension of the shoulder pad or the cuff of the glove Ideally, the bicep extension of the shoulder pad should overlap the elbow pad
